Profile

Former Project Manager with a proven record of being able to work within a team looking to pursue an Entry Level Web Developer position and to grow my career within the field.

Knowledgeable in a wide variety of web languages as well as the principles and techniques of website construction and maintenance. Great at conveying industry specific topics to a variety of professional and general audiences in a clear and understandable manner and very much in tune with the aesthetics and UI of a site.

Efilm   **Los Angeles, CA**
Senior Software Project Manager   **11/2015-12/2017**

- Brought into this role due to a high level understanding of digital technology in filmmaking, having the ability to communicate with clients as well as having a good working relationship with fellow staff.

- Helped develop, update, and maintain an online Portal for clients to submit work requests and have the work pulled, colored, sized, rendered and delivered all automatically from the backend with minimal human interaction. This dramatically cut down on the number of staff needed to service projects and sped up the time needed to fulfill a client's request.

- Helped develop a number of software tools to convert the workflow of many of the company's analog procedures into a digital one. This gave our company a competitive advantage to the rest of the industry as being one of the earlier companies to venture into moving towards a digital workflow.
