- Project Management
- Strong collaborative skills
- Knowledge of Windows, Linux, UNIX, and MAC operating systems
- Exceptional organizational skills
- Strong knowledge of Microsoft Office suite
- Analytical problem-solving and troubleshooting skills
- Verbal and written communication skills

Experience

Efilm   **Los Angeles, CA**
Senior Software Project Manager - Software Dept.   **11/2015-12/2017**

- Brought into this role due to an above average understanding of digital technology in filmmaking, and having the ability to communicate with clients as well as having a good working relationship with fellow staff.
- Helped develop, update, and maintain an online Portal for clients to submit work requests and have the work done, colored, sized, rendered and delivered all automatically from the backend with minimal human interaction. This dramatically cut down on the number of staff needed to service projects and sped up the time needed to fulfill a client's request.
- Helped develop a number of software tools to convert the workflow of many of the company's analog procedures into a digital one. This gave our company a competitive advantage to the rest of the industry as being one of the earlier companies to venture into moving towards a digital workflow.
- Maintained relationships with studio executives as well as producers and editorial to ensure all digital workflows met their expectations and continued getting feedback to adapt the Portal to the ever changing digital landscape in filmmaking.

Trailer Producer - Trailers Division   **11/2014-10/2015**

- Worked with the movie studio marketing departments to work on movie advertising campaigns and trailers. Some notable projects are Creed, Peanuts Movie, Jurassic World.

Senior VFX Project Manager - Production Dept.   **06/2010-10/2014**
Project Manager - Production Dept   **01/2006-05/2010**
Assistant DI Producer - Production Dept.   **07/2004-12/2005**

- In charge of the successful completion of movie project assigned by its release date, while keeping the budget under or within the agreed upon terms.
- Managed the expectations of clients at both the Editorial, Production and Studio level.
- Maintained a great working relationship with back-end staff in order to create a team dynamic, ultimately getting the job done perfectly and on time.
- Mentored newer Project Managers to help them succeed at completing their projects.

Education

University of Washington   **Seattle, WA**
Certificate in Front-End Development with HTML, CSS, and Javascript   2018

State University of New York at Stony Brook   **Stony Brook, NY**
Bachelor's of Arts, History, Minor in Business Management   2000

Technical Skills

HTML, CSS, Javascript, React, Unix, Git
